Computer Science graduate targeting entry-level DevOps Engineer, Cloud Engineer, and Cloud Infrastructure Engineer roles. Hands-on experience with Linux administration, Bash scripting, Python, Git/GitHub, and AWS services including EC2, IAM, and CloudWatch. Built a Linux system health monitoring tool and a deployed AI application, while gaining software development lifecycle and API testing experience during a software testing internship. Currently strengthening AWS, automation, Terraform, and infrastructure engineering skills through hands-on learning.

SKILLS

Cloud	AWS, EC2, IAM, CloudWatch
Linux & Systems	Linux Administration, Bash Scripting, Process Management, System Monitoring, Log Management, Networking, Command-Line Tools
Programming & Automation	Python, Bash, SQL
DevOps & Version Control	Git, GitHub
Databases	MySQL, SQLite, SQL Querying
APIs & Backend	FastAPI, REST APIs, JSON, Google Gemini API, Postman, Uvicorn
Testing	Functional Testing, Regression Testing, End-to-End Testing, Defect Tracking

PROJECTS

Linux System Health Monitor (Bash)

GitHub

- Built a modular Bash-based Linux monitoring tool covering CPU, memory, disk, process, user, load average, system, and network health.
- Implemented configuration file support, health status checks, structured logging, and command-line arguments for repeatable system monitoring.
- Used standard Linux utilities including `awk`, `grep`, `cut`, `top`, `free`, `df`, `ps`, and `bc` to collect and process system information.

ChaitraliAI — AI Voice Interview Agent

GitHub

- Developed a web-based AI interview agent using FastAPI, REST APIs, and Google Gemini API to generate responses based on candidate-specific information.
- Implemented interview session handling, conversation history, reset functionality, session logging, and a backend health-check endpoint.
- Deployed the frontend and backend over HTTPS using Render, with API-key configuration through environment variables and interactive API documentation through OpenAPI.

PROFESSIONAL EXPERIENCE

Software Testing Intern

Jan 2026 – Apr 2026

Infynow Software Solutions LLP

Kolhapur, Maharashtra

- Tested REST APIs using Postman for Django-based web applications, verifying request/response behavior across backend and frontend workflows.
- Used SQLite queries to validate backend data integrity and verify application behavior against stored data.
- Performed functional, regression, and end-to-end testing for Property Listing and Product Listing modules, documenting defects and verifying fixes.
- Collaborated with developers in an Agile SDLC environment to support defect resolution and reliable feature releases.

EDUCATION

Bachelor of Engineering in Computer Science	2023 – 2026
KLE Technological University, Dr. M. S. Sheshgiri Campus	Belagavi, Karnataka
Diploma in Electronics and Communication	2020 – 2023
Motichand Lengade Bhartesh Polytechnic College	Belagavi, Karnataka
